### **NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

For the three and six months ended June 30, 2024 and 2023  
(unaudited)

#### **1. NATURE OF OPERATIONS**

Saturn Oil & Gas Inc. (“Saturn” or the “Company”) is a Canadian resource company engaged in the business of acquisition, exploration and development of petroleum and natural gas resource deposits in Western Canada. The Company’s current focus is to advance the exploration and development of its oil and gas properties in Alberta and Saskatchewan. The common shares and certain warrants of the Company are listed on the Toronto Stock Exchange (“TSX”) and trade under the symbols “SOIL” and “SOIL.WT.A”.

The Company’s corporate headquarters are at 2800, 525 - 8th Ave SW, Calgary, AB, T2P 1G1, and its registered office is located at 230 – 22 Street East Suite 800, Saskatoon, SK, S7K 0E9.

#### **2. BASIS OF PREPARATION**

##### **Statement of compliance**

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IFRS Accounting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), and in accordance with IAS 34 – Interim Financial Reporting. The unaudited condensed consolidated interim financial statements do not include all information required for annual consolidated financial statements and should be read in conjunction with the Company’s audited consolidated financial statements for the year ended December 31, 2023. These unaudited condensed consolidated interim financial statements have been prepared following the same accounting policies as the Company’s audited consolidated financial statements for the year ended December 31, 2023. The IASB issued amendments to IAS 1 - Presentation of Financial Statements, effective January 1, 2024, related to the classification of liabilities as current and non-current. The amendment clarifies that the classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting period. These amendments to IAS 1 did not have a material impact on the Company’s financial statements.

These unaudited condensed consolidated interim financial statements were approved and authorized for issue by the Company’s Board of Directors on July 30, 2024.

##### **Operating environment**

The marketability and price of oil and natural gas that may be produced, acquired or discovered by the Company continues to be affected by global events. International conflicts, shifts in social opinion, geopolitical instability and changes to political regimes may have a significant impact on the price of crude oil and natural gas and Saturn’s petroleum and natural gas sales. While the specific impact to the Company would depend on the nature of the occurrence, any major event can cast uncertainty over future financial performance.

##### **Basis of measurement, functional and presentation currency**

The unaudited condensed consolidated interim financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value through profit or loss.

The unaudited condensed consolidated interim financial statements are presented in Canadian dollars, which is the Company’s functional currency.

##### **Significant judgments, estimates, fair values and accounting policies**

The preparation of the unaudited condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the application of accounting policies impacting fair value and the reported amount of assets, liabilities, income and expenses. Actual results may differ materially from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Significant judgments, estimates and assumptions made by management in these unaudited condensed consolidated interim financial statements are outlined in note 2 of the Company's December 31, 2023 annual consolidated financial statements. There have been no changes in the Company's judgments, estimates, accounting policies or determination of fair values applied during the interim period ended June 30, 2024, relative to those described in the most recent annual consolidated financial statements as at and for the year ended December 31, 2023.

### 3. ACQUISITIONS AND DISPOSITIONS

#### South Saskatchewan acquisition

On June 14, 2024, the Company acquired certain oil and gas properties in southern Saskatchewan (the "South Saskatchewan Acquisition"). The South Saskatchewan Acquisition is comprised of two distinct asset packages that directly offset existing core properties, which include Battrum area assets located in Southwest Saskatchewan (the "Battrum Assets") and Flat Lake area assets located in Southeast Saskatchewan (the "Flat Lake Assets") (collectively, the "Acquired Assets"). The South Saskatchewan Acquisition was completed for total cash consideration of \$534.8 million, subject to finalization of customary closing adjustments. The South Saskatchewan Acquisition has been accounted for as a business combination using the acquisition method of accounting, whereby the assets acquired and liabilities assumed are recorded at the estimated fair value on the acquisition date. There were \$14.4 million of transaction costs incurred by the Company and expensed through earnings.

The determination of the purchase price, based on management's estimate of fair values, is as follows:

(\$000s)	June 14, 2024
Fair value of net assets acquired:	
Property, plant and equipment	621,381
Deferred income tax liability	(13,661)
Decommissioning obligations	(31,911)
Gain on acquisition	(40,983)
<b>Total</b>	<b>534,826</b>
Consideration:	
Cash	534,826
<b>Total</b>	<b>534,826</b>

Results from operations for the Acquired Assets are included in the Company's interim condensed financial statements from the closing date of the transaction to June 30, 2024 on a prospective basis. The estimated acquisition date fair value attributed to PP&E was calculated from a blend of discounted reserve values and relevant market metrics. The reserve values were derived from the estimate of proved developed producing oil and gas reserves and the related cash flows prepared by independent third-party reserve evaluators as at December 31, 2023 and updated internally by management to the date of the acquisition. The estimated proved developed producing oil and gas reserves and the related cash flows were discounted at a rate based on what a market participant would have paid, as well as market metrics in the prevailing area at that time. The fair value of decommissioning obligations was estimated using a credit adjusted risk free rate of 10.0%.

Petroleum and natural gas sales of \$17.6 million and net income of \$5.9 million are included in the statement of income (loss) and comprehensive income (loss) for the South Saskatchewan Acquisition from the closing date of June 14, 2024 to June 30, 2024. Had the South Saskatchewan Acquisition occurred on January 1, 2024, the incremental petroleum and natural gas sales, net income for the period ended June 30, 2024 and the pro forma results would have been as follows:

(\$000s)	As stated	Acquisition prior to close date	(Unaudited) Pro Forma
Petroleum and natural gas sales	377,072	179,588	556,660
Net income	(21,177)	41,190	20,013

## Swan Hills Disposition

On June 4, 2024, the Company disposed of its non-core Deer Mountain property in North Alberta (the “Deer Mountain Disposition”) for cash consideration of \$25.7 million with a carrying value of \$25.6 million resulting in a gain of \$0.1 million.

## Adonai Resources II Corp

On May 6, 2024, the Company completed the acquisition of Adonai Resources II Corp. (the “Adonai Acquisition”) for total cash consideration of \$8.3 million. The Company applied the optional IFRS 3 concentration test which resulted in acquisition being accounted for as an asset acquisition recorded at cost.

### Senior Secured Notes

On June 14, 2024, Saturn issued US\$650 million of Senior Secured Notes (the "Senior Notes"). The Senior Notes bear interest at 9.625% per annum, payable semi-annually in arrears, have mandatory payments of 10% per annum, payable quarterly, and have a 5-year term maturing on June 15, 2029. As at June 30, 2024, the principal balance on the Senior Notes was \$889.7 million (US\$650 million).

The Senior Notes are not subject to any financial covenants and are secured by a second priority lien on substantially all of the assets of the Company. Subject to certain exceptions and qualifications, the Senior Notes contain certain covenants that limit the Company's ability to, among other things, incur additional indebtedness, create or permit liens to exist, and make certain restricted payments, dispositions and transfers of assets. In addition, the Company is subject to certain minimum hedging requirements that are consistent with the Company's risk management policy. As at June 30, 2024, the Company is in compliance with all covenants.

The Senior Notes have mandatory prepayments equal to 10% per annum of principal amount of the notes outstanding on the Issue Date, paid quarterly no later than 30 days after the end of each fiscal quarter, beginning September 30, 2024 at a redemption price of 104.813%. The Company may redeem up to an additional 10% of the aggregate principal amount during any 12-month period at a redemption price equal to 103%. Additionally, at any time prior to June 15, 2026, the Company may redeem up to 35% of the aggregate principal amount of the Senior Notes at a redemption rate of 109.625% via proceeds from an equity offering; provided that at least 50% of the aggregate principal amount of the notes remain outstanding immediately following the redemption. On or after June 15, 2026, the Company may redeem all or a part of the notes at the following redemption prices: June 15, 2026 to June 14, 2027 at 104.813%, June 15, 2027 to June 14, 2028 at 102.406% and June 15, 2028 to June 15, 2029 at 100%.

As at June 30, 2024, the fair value of the 2026 Notes was \$899.2 million (US\$657.0 million) based on observable market quoted prices (Level 1).

### Revolving Credit Facility

On June 14, 2024, Saturn entered into a \$150.0 million credit facility (the "Credit Facility") with a syndicate of banks. The Credit Facility consists of a \$100.0 million reserve-based credit facility and a \$50.0 million operating facility. The Credit Facility is a committed facility available on a revolving basis until June 14, 2026, at which time it may be extended at the lenders' option. If the revolving period is not extended, the undrawn portion of the facility will be cancelled and any amounts outstanding would be repayable at the end of the non-revolving term. The Credit Facility is subject to a semi-annual borrowing base review, occurring by June 30<sup>th</sup> and November 30<sup>th</sup> of each year, with the first borrowing base review to occur by June 30, 2025. The borrowing base is determined based on the lenders' evaluation of the Company's petroleum and natural gas reserves and their commodity price outlook at the time of each renewal.

The Credit Facility is secured by a first priority security interest on all present and after acquired property of the Company and is senior in priority to the Senior Notes. The Credit Facility contains certain covenants that limit the Company's ability to, among other things, incur additional indebtedness, create or permit liens to exist, make certain restricted payments, and dispose of or transfer assets. As at June 30, 2024, the Company is in compliance with all covenants.

As at June 30, 2024, amounts borrowed under the Credit Facility bear interest at a floating rate based on the applicable Canadian prime rate, US base rate, Canadian Overnight Repo Rate Average ("CORRA"), or Secured Overnight Financing Rate ("SOFR") plus a margin and standby fee based on the Company's Net Debt to Consolidated EBITDA Ratio as defined in the Credit Agreement, currently between 2.50% to 3.50% and 0.88%, respectively.

As at June 30, 2024, the Company had no amounts drawn nor any of letters of credit outstanding under the Credit Facility.

### Unsecured letter of credit facility

The Company has a \$10.0 million unsecured demand letter of credit facility (the "LC Facility") with a Canadian bank. Saturn's obligations under the LC Facility are supported by a performance security guarantee ("PSG") from Export Development Canada. At June 30, 2024, \$7.4 million was drawn under the LC Facility (December 31, 2023 - \$8.6 million). The PSG is subject to annual renewal with the next scheduled renewal date of February 28, 2025.

### Senior Term Loan

On June 14, 2024, the Company early retired its Senior Term Loan with a principal amount outstanding of \$364.7 million and associated early retirement fees of \$27.4 million paid to the lender. In addition, \$4.4 million of non-cash original issue discount and debt issue costs were accelerated and expensed in profit or loss.

## Stock options

The Company has an omnibus long term incentive plan (“LTIP”) under which it is authorized to grant stock options to directors, officers, employees and consultants enabling them to acquire common shares of the Company upon exercise. The stock options are generally granted for maximum term of five years, and vest in thirds on each of the first, second and third anniversary after the grant date. Vesting conditions are determined by the Board of Directors.

## Restricted Share Units

In accordance with the LTIP, the Company is authorized to grant Restricted Share Units (“RSUs”) to directors, officers, employees and consultants. The RSUs are granted for a term of three years and vest in thirds on each of the first, second and third anniversary after the grant date. The RSUs may be cash or equity settled upon vesting as determined by the Board of Directors. The fair value per RSU is equivalent to the market price at which the common shares of the Company traded on the day immediately preceding the grant date.

## Performance share units

In accordance with the LTIP, the Company is authorized to grant Performance Share Units (“PSUs”) to directors, officers, employees and consultants. The PSUs are granted for a term of one year with certain performance measures specified at the grant date and may be cash or equity settled upon vesting as determined by the Company's Board of Directors. Based upon the achievement of the performance measures, a pre-determined adjustment factor between 0.5-1.5x is applied to the PSUs eligible to vest at the end of the performance period. The fair value per PSU is equivalent to the market price at which the common shares of the Company traded on the day immediately preceding the grant date.

### Performance warrants

The Company has issued performance warrants to certain officers and directors enabling them to acquire common shares of the Company upon exercise. The performance warrants will vest upon certain vesting threshold conditions, based on the 5-day volume weighted average trading price (“VWAP”) of the Company’s common shares listed on the TSX. Once vested, the performance warrants may be exercised by the holder at any time from the date of vesting to the expiry date. A summary of the changes in performance warrants outstanding is as follows:

### Per share amounts

Basic net income (loss) per share is calculated using the weighted-average number of common shares outstanding during the reporting period. Diluted net income (loss) per share is calculated using the weighted-average number of common shares outstanding adjusted for the dilutive effect of all potentially dilutive securities, including stock options, broker options, warrants, RSUs and convertible notes. Where applicable, diluted net loss per share is equal to basic net loss per share as the effect of all potential dilutive securities are anti-dilutive. The components of basic and diluted net income (loss) per share are as follows:

(000s, except per share amounts)	Three months ended June 30,		Six months ended June 30,	
	2024	2023	2024	2023
Weighted average shares outstanding

	<b>212,084</b>	178,719	<b>383,772</b>	312,087

Petroleum and natural gas sales represent the proceeds received from the sale of oil, natural gas, and NGLs production under variable price contracts. The transaction price is based on a benchmark commodity price, adjusted for quality, location, processing charges or other factors, whereby each component of the pricing formula (apart from the benchmark commodity price) can be either fixed or variable, depending on the contract terms. Revenue is typically collected on the 25th day of the month following the prior month's production, with revenue being recorded once the product is delivered to a contractually agreed upon delivery point.

Included in accounts receivable as at June 30, 2024 is \$80.9 million (December 31, 2023 - \$53.7 million) of accrued petroleum and natural gas sales related to June 30, 2024 production.

Saturn generates oil treating, gas processing, and other services revenue from fees charged to third parties provided at facilities where Saturn has an ownership interest. This revenue is recorded as processing income.

## 13. CAPITAL MANAGEMENT

The Company manages its capital to safeguard its ability to continue as a going concern, so that it may provide adequate returns to shareholders, benefits to other stakeholders and have sufficient funds on hand for business opportunities as they arise. The Company's capital structure may be adjusted by issuing or repurchasing equity instruments, issuing or repurchasing debt, modifying capital spending programs and disposing of assets; the availability of any such means being dependent upon market conditions. Management reviews its approach to capital management on an ongoing basis and believes that this approach is appropriate. The Company uses the terms adjusted EBITDA, adjusted funds flow, free funds flow, net debt, capital expenditures and adjusted working capital as key capital management measures which are described and calculated below. These capital management measures are not standardized and therefore may not be comparable with the calculation of similar measures by other entities.

### Adjusted EBITDA

The Company considers Adjusted EBITDA ("Adjusted EBITDA") defined in the credit agreement as Consolidated EBITDA to be a key capital management measure as it is both used within certain covenants prescribed under the Company's Credit Facility (note 8) and demonstrates Saturn's standalone profitability, operating and financial performance in terms of cash flow generation, adjusting for interest related to its capital structure. Adjusted EBITDA is defined by the Company as earnings before interest, taxes, depreciation, amortization and other non-cash or extraordinary items.

### Adjusted funds flow

The Company considers adjusted funds flow to be a key capital management measure as it demonstrates Saturn's ability to generate the necessary funds to manage production levels and fund future growth through capital investment. Management believes that this measure provides an insightful assessment of Saturn's operations on a continuing basis by eliminating certain non-cash charges, actual settlements of decommissioning obligations, of which the nature and timing of expenditures may vary based on the stage of the Company's assets and operating areas, and transaction costs which vary based on the Company's acquisition and disposition activity.

### Free funds flow

The Company considers free funds flow to be a key capital management measure as it is used to determine the efficiency and liquidity of Saturn's business, measuring its funds available after capital investment available for debt repayment, pursue acquisitions and gauge optionality to pay dividends and/or return capital to shareholders through share repurchases. Saturn calculates free funds flow as adjusted funds flow in the period less expenditures on property, plant and equipment and exploration and evaluation assets, together "capital expenditures". By removing the impact of current period capital expenditures from adjusted funds flow, management monitors its free funds flow to inform its capital allocation decisions.

The following table reconciles adjusted EBITDA, adjusted funds flow and free funds flow to cash flow from operating activities:

(\$000s)	Three months ended June 30,		Six months ended June 30,	
	2024	2023	2024	2023
Cash flow from operating activities	50,545	94,232	120,767	138,143

Free funds flow	66,094	53,109	100,306	83,287

(1) Calculated as interest expense, net of interest revenue.

(2) Calculated as expenditures on PP&E and E&E assets on the consolidated statements of cash flows.

### Market capitalization and net debt

Management considers net debt a key capital management measure in assessing the Company's liquidity. Total market capitalization and net debt to annualized quarterly adjusted funds flow are used by management and the Company's investors in analyzing the Company's balance sheet strength and liquidity. The summary of total market capitalization, net debt, annualized quarterly adjusted funds flow and net debt to annualized quarterly adjusted funds flow is as follows:

(\$000s)	June 30, 2024	December 31, 2023
Total common shares outstanding (000s)	204,041	139,313

Net debt to annualized quarterly adjusted funds flow	2.2x	1.4x
Annualized proforma quarterly adjusted funds flow	533,572	
Net debt to annualized proforma quarterly adjusted funds flow	1.5x	

(1) Represents the closing share price on the TSX on the last day of trading of the period.

(2) Adjusted working capital is calculated as cash, accounts receivable, deposits and prepaids net of accounts payable.

## 14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company is exposed to various financial instrument risks and assesses the impact and likelihood of this exposure. These risks include liquidity risk, credit risk, currency risk, interest rate risk and price risk. Where material, these risks are reviewed and monitored by the Board of Directors.

### Financial derivatives

Saturn manages the risks associated with changes in commodity prices by entering into a variety of risk management commodity contracts classified as financial derivatives. The Company assesses the effects of movement in commodity prices on income (loss) before tax. A ten percent increase or decrease in commodity prices would have resulted in a \$80.3 million change to unrealized gains (losses) on risk management contracts and net income (loss) before tax assuming all other variables remain constant.

The Company had the following outstanding financial derivative commodity contracts as at June 30, 2024:

### Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations that arise principally from the Company's accounts receivable from oil and natural gas marketers and joint operators in the oil and gas industry. Receivables from oil and natural gas marketers are normally collected on the 25th day of the month following production.

The Company's policy to mitigate credit risk going forward is to maintain marketing relationships with large, established and reputable purchasers that are considered to be creditworthy. The Company attempts to mitigate the risk from joint venture receivables by obtaining partner approval of significant capital and operating expenditures prior to expenditure and in certain circumstances may require cash deposits in advance of incurring financial obligations on behalf of joint venture partners. Joint venture receivables are from partners in the petroleum and natural gas industry who are subject to the risks and conditions of the industry. Significant changes in industry conditions and risks that negatively impact partners' ability to generate cash flow will increase the risk of not collecting receivables. The Company does not request letters of credit in its favor from joint venture partners; however, the Company has the ability to withhold production from joint operating partners in the event of non-payment or is able to register security on the assets of joint operating partners.

### Currency risk

Currency risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum and natural gas sales are conducted in Canada and are denominated in Canadian dollars. Canadian commodity prices are influenced by fluctuations in the Canada to United States dollar exchange rate. Prices for oil are determined in global markets and generally denominated in United States dollars. The Company is exposed to currency risk in relation to its US dollar denominated financial derivatives and Senior Notes. A ten percent change in the US dollar would have resulted in a \$9.7 million change to net income (loss) before tax (December 31, 2023 – \$3.6 million) assuming all other variables remain constant. The exposure of realized prices fluctuations of the US dollar and Canadian dollar exchange rate, serves as natural hedges to the US dollar denominated financial derivatives.

### Price risk

The Company is exposed to price risk related to commodity and equity prices. Equity price risk is the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is the potential adverse impact on earnings and economic value due to commodity price movements and volatility. The Company's commodity price risk is also impacted by its derivative contracts. The ability of the Company to explore its resource properties and future profitability of the Company are directly related to the market price of commodities. Prices for oil are impacted not only by the relationship between the Canadian and United States dollars but also worldwide economic events that influence supply and demand.

## Net debt and capital structure

Management considers net debt a key measure in assessing the Company's liquidity. The Company's net debt and capital structure is as follows:

(\$000s)	June 30, 2024	December 31, 2023
Net debt	792,193	460,483
Shareholders' equity	737,064	608,662
Total capitalization	1,529,257	1,069,145

The Company manages its capital structure to support current and future business plans and periodically adjusts the structure in response to changes in economic conditions, acquisitions or divestitures and the risk characteristics of the Company's underlying assets and operations. The capital structure may be adjusted by issuing or repurchasing shares, issuing or repurchasing debt, modifying capital spending programs and acquisition or disposal of assets, the availability of any such means being dependent upon market conditions.
